BUSINESS DEVELOPMENT OF BTV AG DURING THE FIRST QUARTER OF 2007

ECONOMIC ENVIRONMENT

A positive business outlook and mild weather at the beginning of the year allowed Austria's economy to grow in the first quarter by 0.8 % in real terms over the previous period, according to the current first estimate from the Austrian Institute for Economic Research. This results in a real increase of 3.2 % compared with the first quarter of 2006. Exports from the country were again the most important pillar of the economy at the beginning of the year. Investments in equipment and machinery, on the other hand, were rising rather more weakly than in the preceding periods. Private household spending on consumer goods continued to be rather subdued in response to the upswing in the economy that has now been going on for a year. Europe's economic prospects continued to improve. Economic recovery in France, Germany and Italy was the principal reason for the strengthening of the growth. In addition to exports making excellent progress, the factors driving domestic demand were also slowly gaining in strength. The strong growth dynamics of the Eurozone persisted in the first quarter and, despite the risks posed by the euro/dollar exchange rate, many factors suggest this trend will continue, though perhaps with rather weaker dynamics.

The interest rate situation during the first quarter of 2007 was characterised by a curve that was steepening somewhat, as a sideward trend was discernible at the short end while the longer terms moved up. Our customers, though, continued to deploy their funds above all in securities with short and medium terms.

INCOME

Interest

The rise in interest-earning operations is the result of increased customer business volumes in financing operations and primary deposits, and also of fresh buying for our own securities holdings. In addition higher dividends and revenues from at equity participations made their contribution to the increase in the net interest income of 9.0 %, namely of € 2.3 million to € 27.5 million.

Loan loss provisions

The loan loss provisions represent the balance resulting from increased provisions for doubtful debts and the writing back of loan loss provisions, including direct write-offs on claims. They are supplemented by receipts arising from claims that have already been written off. The loan loss provisions for firms and private individuals was € 7.2 million, which was slightly above the level of the previous year.

Commission

The result in the commission and fee-earning business is predominantly attributable to excellent sales of securities, which

increased again in relation to the very good result of the previous year. Revenues in this core division of BTV grew in the first quarter by € 0.4 million or 5.0 % to € 7.5 million. Foreign exchange commission and income from loans attained approximately last year's level. The revenues from payment transactions were, on the other hand, slightly above the 2006 quarterly results. Net commission income as a whole went up by 1.7 % to € 12.7 million.

Trading

At € 0.7 million net trading income was below the previous year's result. The main reason for this development was markedly lower hedging transactions for our own securities holdings. This led to a drop in the revenues from derivatives of € 1.3 million. In order to keep hedging transactions flexible they are not stated under hedge accounting, but are recorded in trading results. The trading results in the securities and foreign exchange business were in total only € 0.2 million below the comparable figure for the previous year.

Operating expenses

Administrative expenditure (Personnel and operating expenditure including depreciation on tangible assets) rose compared with the previous year by 3.3 % to € 22.5 million, chiefly owing to BTV's expansion.

Personnel expenditure rose by 1.3 % to € 14.7 million. The main reason for this low increase was the reduced expenditure on personnel provisions, which were down on the previous year by € 0.9 million. In the reporting year itself the formula for career trends was adjusted from 0.25 % to 0.50 %, and the proportionate expenditure was entered. In addition a flat-rate safety surcharge of 5 % of the cash value was estimated (and proportionately accounted for) in respect of the adjustment in the calculation bases for pension obligations (mortality tables) expected in the future.

Wages and salaries, on the other hand, rose by 7.4 % to € 9.9 million. In addition to the collective agreement rise, it was the increased number of employees involved in the expansion markets that was particularly responsible for the rise in costs. That number increased in total (weighted according to the level of employment) compared with the previous year by 40, to 856 employees.

An uplift in EDP costs owing to our expansion and higher office expenditure were the main reasons for the increase in expenditure on tangibles of € 0.3 million to € 0.6 million. Higher depreciation on buildings, especially, led to depreciation on assets as a whole climbing by 12.8 % to € 1.8 million.

Other operating income

The profit balance increased from € 0.3 million in the previous year to € 1.6 million. This improvement is wholly attributable to the increased success with which securities have been sold. The more volatile performance on the equity markets led, especial-

ly, to targeted profit taking. Other operational revenues went down by € 0.3 million, while other operational expenditure went up by € 0.1 million. These developments led to a surplus (before taxation) for the period of € 12.9 million, which was 11.2 % above the previous year.

Tax

The amounts stated under the heading "Taxes on income and profit" concern, in particular, the active and passive deferrals of latent taxes to be undertaken in accordance with IFRS in addition to the on-going Austrian corporation tax charge. This results in a tax burden of € 2.0 million for the first quarter of 2007, on which BTV indicates a tax ratio of 15.5 % (it was 14.4 % in the previous year).

Consolidated profit

The after-tax surplus for the period rose by 9.7 % to € 10.9 million compared with € 9.9 million the previous year.

The return on equity based on the group before-tax surplus as at 31 March 2007 was 10.1 % against 9.9 % for the previous year. The cost/income ratio went up slightly from 54.5 % to 54.9 %, while the risk/earnings ratio improved by 27.2 %, to 26.1 %.

BALANCE SHEET

The balance sheet total of the BTV group turned out to be on the decline vis-à-vis the end of 2006, having reduced by 2.0 % or € 151 million. On the asset side it was the claims on customers at risk that were behind this trend, with a drop of 4.8 % or € 252 million. It was chiefly short-term finance to institutional clients, which was down by € 154 million, and seasonally related repayments in the cable car and tourism sectors that led to this performance. The level of risk provisioning rose moderately by 3.0 % to € 157 million.

The more volatile development on the equity and capital markets led to higher trading activity in the first three months. The growth in the volume of financial assets held for trading purposes subdivided into € 20 million for bonds and € 10 million for equities. The growth of € 45 million to € 1,143 million-worth of securities outstanding resulted from fresh buying of fixed-interest securities. The stock of equities reduced by € 11 million to € 99 million. At € 615 million financial assets were slightly below their end-year level. Here capital repayments in the 'held to maturity' category balanced higher amounts stated under shareholdings valued 'at equity'.

On the liability side customer deposits were expanded by 7.0 % to € 4,586 million. The company clientele grew by € 144 million, the private clientele by € 72 million. The increase in institutional clients' deposits of € 91 million was mostly the result of

intensified activity in the German expansion market. The € 5,185 million total of primary deposits, including subordinated capital, was 5.6 % up on the end 2006 figure. The liquidity ratio of customer claims after risk provisioning rose thereby to about 120 %.

The banking group's own equity eligible under the BWG (Austria's banking law) amounted at the end of the 1st quarter to € 628.3 million (it was € 617.4 million in December 2006). The statutory minimum requirement was € 411 million as at 31 March 2007, which was the equivalent of an over-covering of about 54 % (it was about 49 % in December 2006).

As at 31 March 2007 the banking group's core capital, at € 363.8 million, was in accordance with the BWG (it had been € 363.7 million in December 2006). The quarterly reporting date's core capital ratio of 7.13 % resulting from that was 0.09 of a percentage point above the comparable figure at the end of 2006. The own equity ratio had improved from 11.95 % to 12.31 %, thus exceeding by some way the statutory minimum ratio required of 8.0 %. This positive development resulted first and foremost from the diminishing financing volumes.

OUTLOOK

As already mentioned, Austria's economic growth of 3.2 % in the first quarter turned out to be higher than had originally been expected. Goods exports and investments are the load-bearing pillars underpinning the economic upswing. The eastern part of Switzerland, and the German states of Baden-Württemberg and Bavaria are enjoying a similar performance. A positive environment for our business development for the whole of 2007 is expected, even if the industrial boom weakens somewhat in the further course of the year, and even if the interest rates that have risen lead to some slight cooling in the demand for credit.

BTV's markets are in the economically strongest region of Europe. BTV will extend its market leadership in the Tyrol and the Vorarlberg in the coming years, and score points as a specialist in its expansion markets. The first quarter's result is in complete harmony with the annual plan such that – subject to the usual reservation on the meaningfulness of any individual quarter – the group after-tax surplus is expected to be about € 50 million at the year end.

V. BTV GROUP: NOTES

Accounting and Valuation Principles

The group intermediate statements are drawn up under IFRS and IFRIC (International Financial Reporting Interpretations Committee) requirements as exempt consolidated financial statements under § 59a of the BWG in combination with § 245a of the UGB. All the standards we have a duty to apply to the financial years have been applied in drawing up these group financial statements. Standards or interpretations that have already been published and taken over by the EU, which do not yet have to be applied mandatorily, have not been applied prematurely. This set of un-audited intermediate statements as at 31 March 2007 is in harmony with IAS 34.

Starting on 1 January 2007 the career trends accounting formula for social insurance provisions was raised from 0.25 % to 0.50 %. The additional expenditure was spread evenly over the 2007 calendar year.

There were no changes to the remaining accounting and valuation methods in the period reported.

Material events over the reporting period

At the beginning of February BTV opened its fourth branch in the market territory of Southern Germany, in Rosenheim, and its third advisory office in Northern Italy in Bolzano.

Post-interim balance sheet events

With respect to the resolutions adopted at the 89th Annual General Meeting on 21 May 2007, attention is drawn to the announcement on the BTV Homepage under the heading 'investor relations' (www.btv.at).

After the date of the intermediate report there were no reportable activities or occurrences in the BTV group that, in their form or factual content, would have influenced the picture of its assets, finances and profits conveyed in that report.

V. BTV GROUP: SEGMENT REPORTING

Corporate banking

Profits rose on the company clientele side of the business by 21.8 % compared with the previous year, with a before-tax surplus for the period of € 5.9 million. Volume extensions both in the asset business and in deposits led in total to an improvement in net interest income of € 2.24 million or 18.0 %. The growth in net commission income is primarily accounted for by positive developments in payment transactions, while the loan and foreign exchange businesses were slightly below the level of the previous year. Rising personnel costs brought about by our expansion in Bavaria and Baden-Württemberg led to administrative costs increasing by € 0.6 million or 10.1 %. The cost/profit ratio improved vis-à-vis the previous year by 38.1 %, to 36.5 %, while the interest charged on our own funds rose from 8.6 % to 9.7 %.

Retail banking

The first quarter of 2007 also stood out for the satisfactory way in which our securities business for private clients developed. The commission revenues in this division exceeded the high level of the previous year and rose by 5 %, with the commission surplus going up in total by 1.2 % to € 9.46 million. The net interest income increased by 4.1 % over the previous year to around € 11.55 million.

It proved possible to more than compensate for declining margins by developing new business, especially in home building. The administrative expenditure (up 3.1 %) was obviously affected by BTV's expansion activities. The before-tax surplus for the period was € 5.08 million as at 31 March 2007. At 64.4 % the cost/profit ratio was slightly above the previous year, while the return on shareholders' equity improved from 15.8 % to 16.2 %.

Treasury

The flattening interest curve had a negative effect on the Treasury's net interest income. At € 1.28 million that was € .042 million below the previous year's level as at the end of March 2007. The clear setback in trading performance was marked by profit shortfalls arising from hedging transactions, which accounted for € 1.30 million in the first quarter of the previous year. The before-tax surplus for the period amounted to € 4.00 million.

	03/2006	8,6 %	15,8 %	72,4 %		9,9 %

The allocation of the net interest income is made according to the market interest method (a market-oriented fund transfer-pricing system used by Austrian and German banks). Costs are imputed to the correct segment on the basis of origin. Costs not directly imputable are shown under "Other".

The claims segment contains the entries for claims on banks, claims on customers, trading assets, and the current and non-current assets. The entries for liabilities to banks, liabilities to customers, securitised debt and supplementary capital are allocated to the liabilities segment.

The success of the business field concerned is measured by the before-tax annual surplus generated by that segment. The return on own capital is calculated by the ratio of the before tax-annual surplus to the equity capital. The capital allocation

is made according to regulatory requirements. It is allocated in proportion to the own funds requirements of the business fields, and shown in the net interest income as profit from own funds deployed with the corresponding reference interest rate for long-term deployments.

The cost/income ratio is worked out as a quotient arising from the administrative expenditure and the sum arising from the net interest income, the net commission income and the trading income.

BTV EQUITIES AS AT 2007-03-31

The positive economic data and company reports gave the equity markets clear drivers through into the second half of February, and led to an advance on a broad front, with some indices even achieving new historic high points. Statements by ex-head of the FED Alan Greenspan, in which he considered a marked fall for the US economy possible, and sell-outs on the Asiatic markets led, however, to an abrupt end to the global upward movement. Many players in the market had indeed already anticipated a clear correction, although the timing and fierce reaction within a few days still came a something of a surprise. Despite falling short of some short-term upward trends, the long-term trend channel continues to be quite clearly heading upward. Neither has anything changed fundamentally in the positive environment.

The ATX climbed in the first quarter of 2007 by 4.2 % to 4,645.50 points. Over the same period BTV's ordinary shares increased in value by about 19 %, to € 119, while at the end of March its preference shares were listed more than 21 % higher at € 112.
